

**Protect your home from  
THE INVISIBLE KILLERS!**

**VESTIGE** Brings you

# **SHARP** Air Purifier

Improves the quality of air indoors and creates a safe environment for our loved ones.

**Quiet  
Operation**

**Low Energy  
Consumption**

**Suitable for  
any interior**

**HAZE mode  
mounted**

“  
Indoor air pollution kills a million people every year in India – **Hindustan Times**  
Air pollution causing irreversible damage to India's children – **Indian Express**”

**INDOOR Air is 10 times more polluted than OUTDOOR.  
Most of us spend about 90% time in polluted INDOORS.**

### **INDOOR AIR POLLUTION**

#### **We take FOOD & WATER very seriously.....why are we not serious about air?**

We don't realize, but we require about 15,000 liters of air per day, to be able to function and we can only do without it for a few minutes. This is why air undisputedly comes first and the most important primary necessity of our life. Indoor air can be 2 to 5 times (sometimes even 100 times) more polluted than the air outside. Indoor air pollution has consistently been ranked by the Environmental Protection Agency as one of the top five environmental risks to public health.

- 3000 cases of cancer are caused by exposure to indoor air pollutants every year
- 50% of all possible illnesses are caused or aggravated by indoor air pollution
- Only 10% of colds and flues are caught outdoors, and 90% indoors
- Asthma treatment is the most popular reason of hospital visits for children
- According to WHO, 4.3 million people die every year due to household air pollution

### **SHARP & VESTIGE - THE TEAM**

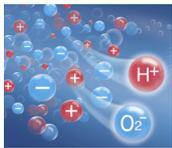

Sharp is a company that is constantly exploring new frontiers of technology, to evolve products that are "Not just No. 1 but the only one" of its kind. By creating products which bring a sense of satisfaction to people, Sharp always intend to meet and exceed expectations of the people. Dedicated to improving people's lives through the use of advanced technology and a commitment to innovation, quality, value, and design. Sharp has an unwavering commitment to excellence and passion for caring. They have teamed up with world renowned experts in the field of indoor air quality and allergies and with years of experience and research Sharp can guide you in maintaining best indoor air quality as an aid to preventing allergies, respiratory diseases and other symptoms triggered by indoor pollutants and irritants.

# VESTIGE brings you "Forest Fresh Safe Air" for your loved ones in association with **SHARP**

Sharp Air Purifiers with Plasmacluster Technology mimics NATURE indoors thus creating a safe and fresh environment just like in a Forest.

## High Density Plasmacluster Ions KILL infection causing substances

Plasmacluster is Sharp's unique sanitizing technology that create fresh air by emitting highly safe Positive and Negative Ions of the same type found in nature. It sanitizes the AIR and SURFACE from virus, mold, dust, allergens and smell. It also reduce static electricity on surfaces and removes clinging odours.

### Ion Emission

Plasma discharges are used to create and release into the air the same positive and negative ions that occur in nature.

### Effect on Mold & Viruses

When the ions comes into contact with the surface of the microbe they transform into OH radicals with extremely powerful oxidation properties, which steals the hydrogen (H) from the protein on the surface breaking it down.

### Ions turn into water & return to the air

The combining of an OH radical with hydrogen (H) creates water which returns to the air.

## Plasmacluster key benefits:

- Plasmacluster is proved effective against many airborne contaminants (as shown above)
- Acts on both airborne and adhering mold
- High Density Plasmacluster helps to maintain the skin's moisture levels, improves its elasticity and acts to smoothen its texture
- Inactivates and removes adhering odours (like tobacco smoke)
- Removes static electricity which attracts airborne particles
- Plasmacluster is effective all year round

## Sharp Air Purifier combines both ACTIVE and PASSIVE Purification

The next generation Air Purification ensure 100% effectiveness from AIR and SURFACE contamination. It uses a method that kills the germs instead of absorbing them.

It spreads air at 20 degree angle that allows it to quickly collect dust and other particles from lower parts of the room.

## The Superior True HEPA

The antimicrobial HEPA Filter provide high performance in capturing more than 99.97% of 0.3 micron dust particles.

With a larger surface area of the filter, it captures more dust and other harmful particles.

99.9% capture and removal of cedar pollen allergens

Tree Pollen

Green Pollen

98.8% removal of dust mite feces, allergens and PM 2.5

Allergen

PM 2.5

## THE SHARP ADVANTAGE

Produce fresh and pure air as in a forest

Kills germs from air & surface: mimics nature

Neutralize odour and toxins

Ions spread throughout the room to purify air

Improve skin moisture, elasticity & texture

## INVISIBLE PROBLEMS IN INDOOR AIR THAT CAUSE AIRBORNE DISEASES HOW SHARP AIR PURIFIER ELIMINATE THEM

<b>Dust (PM2.5), Pollen, Smoke</b>	<b>Smell, Gases, Toxins and Infection causing substance (Dust mite, Mold, Fungi, Virus, Bacteria)</b>	<b>Staleness and Suffocation</b>	<b>Static Current</b>
1. HEPA with large surface area (AHAM Certified) 2. Industry best Clean Air Delivery Rate (CADR) for faster and superior performance	Active Plasmacluster ion Technology does not wait for the air to pass through, but NEUTRALIZES all harmful substance from both AIR and SURFACE by going out of the Purifier	The Plasmacluster technology creates the same level of freshness as in a forest. It is proven technology that can generate FRESH AIR	The Plasmacluster technology removes static current from all SURFACES reducing threat from dust and pollen to get attracted to fabrics

### General Specifications (Model: FP-F30E-H)

Segments/ Application	Home, Office, Doctors Room
Air Purification System	Offers balance combination of ACTIVE & PASSIVE Purification Systems with Plasmacluster Ion Generator and set of Filters
	Plasmacluster Ion Generator with True HEPA & Active Carbon Filter
Coverage Area (sq feet)	220
Body Colour	Off-White combination
Air Flow/ CADR (m3/Hour)	180/ 120/ 60 3 (High/ Medium/ Low)
Pre Filter	Standard

Filter Life	Upto 2 years#
Auto Restart	Yes
Voltage & Frequency	220 to 240VAC & 50/60Hz
Power Consumption (Watts)	51/ 30/ 13 (High/ Medium/ Low)
Noise Level (db)	47/ 38/ 26 (High/ Medium/ Low)
Safety Standard	IEC/ CB

#Based on the standard of The Japan Electrical Manufacturer's Association, JEM1467; 5 cigarettes are smoked per day in the place where the air purifier is installed. The life however will largely depend on the condition in which the unit is installed.

MRP ₹20,250/- | BV 9625 | DP ₹19,250/-
